

Quality and Service Above All

Machine Shop Services

JOB SHOP WORK

- Uintah Machine has several CNC machines and many conventional machine tools available for parts runs of from one item to a few hundred items.

WELDING, FABRICATION AND BUILDUP

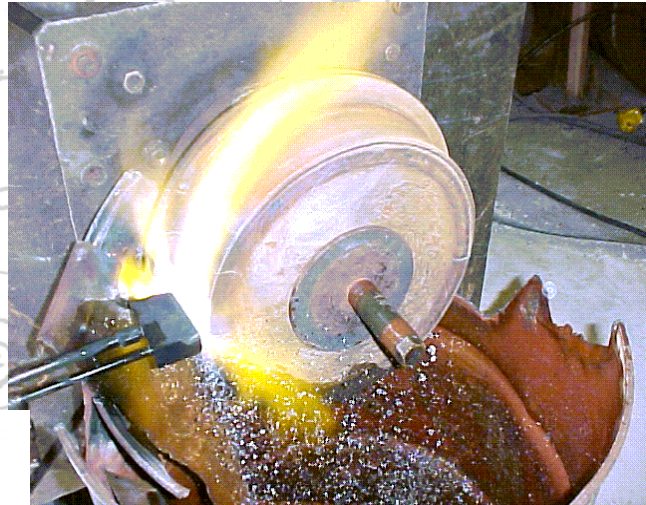

- Years of experience in the coal fields and other industries have made us excellent fabricators.
- Only a few items are shown here, for more examples refer to the various items of mining equipment that we have manufactured over

the years.

FLAME HARDENING

- Durability of mine car wheels, track rollers, pulleys, sheaves, gears and sprockets, can all be improved by flame

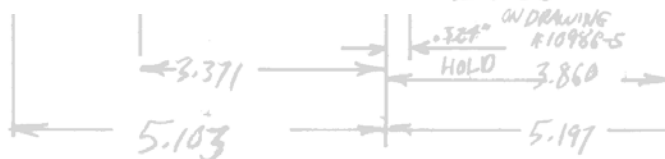

hardening the surface.

SPECIAL PARTS AND BREAKDOWN SERVICES

- Almost any machine part can be built from plate, bar stock, castings, forgings or weldments.
- Some of the parts we build are shafts, couplers, skeins, hubs, housings, covers, pins and linkages, and shear pins.
- We are capable of manufacturing and/or rebuilding machinery parts of every description.
