Uintah Machine Supply Trailers

Supply trailers are a Uintah Machine specialty. They are famous for being

- **Long-lasting.** They have been known to run maintenance-free, excluding periodic lubrication, for up to eight years! (Even we can't keep tires from wearing out.)
- **Incredibly durable and rugged.**
- **World-class quality.**

We have been asked to refurbish trailers built by other companies to make them like ours.

Uintah Machine manufactures a large variety of trailers for general use. They have been designed and built in many shapes and sizes to transport many types of equipment, materials, utilities and supplies. Some have hydraulic push-plates for easy unloading. They have a 20 ton carrying capacity. 24" deck heights are standard, but heights as low as 18" can be obtained. Optional stake pockets, sideboards, headboards and rub bars are also available. Landing legs can be manual or hydraulic. They can be built with a standard pintle hitch, retractable pintle hitch, fifth wheel hitch or fifth wheel with folding gooseneck. Also consider an optional tail roll, a retractable cover attached at the rear of the trailer that can be unrolled and attached at the front to prevent debris from escaping during transportation. As a standard, the trailers are equipped with Uintah Machine's walking beam suspension to keep four wheels on the ground at all times for a relatively smooth ride.

Uintah is happy to design and build a supply trailer to meet your specific needs. Contact us for a free quotation.

Our expertise is not limited to trailers alone Visit our Web site at www.uintahmachine.com for more information about our mining equipment and services.

See also the Hydraulically Unloaded Trailers section and the roof can trailer in Special-Purpose Trailers.
